

Avalanche AI Analytics Platform

Next-Generation Blockchain Intelligence & DeFi Analytics

Powered by Advanced AI Technology

Enterprise Blockchain Solutions

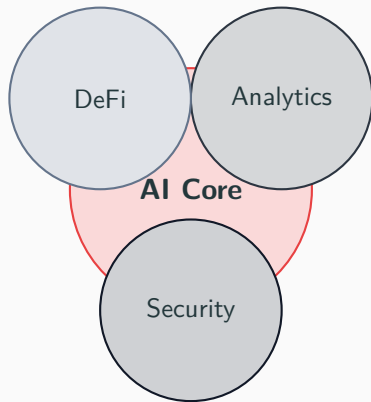

September 14, 2025

Platform Overview

What is Avalanche AI?

- Comprehensive blockchain analytics platform
- AI-powered insights and predictions
- Real-time DeFi monitoring
- Smart contract security analysis

Key Features

Market Intelligence

Real-time price tracking, sentiment analysis, and trading signals

Wallet Analytics

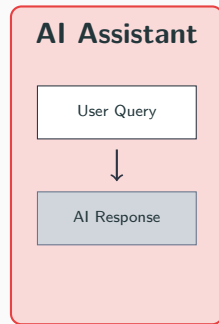

Portfolio tracking, risk assessment, and performance metrics

Security Scanner

Smart contract auditing and vulnerability detection

AI-Powered Chat Interface

- **Natural Language Processing**
 - Ask questions in plain English
 - Get instant blockchain insights
- **Multi-Model Support**
 - DevvAI Integration
 - Kimi-K2 Model
 - Claude 3 & GPT-4
- **Voice Capabilities**
 - Speech-to-text input
 - Text-to-speech responses

DeFi Analytics Dashboard

Protocol	TVL	APY	Risk Level
Trader Joe	\$180M	12.3%	Low
Benqi	\$125M	8.7%	Low
Pangolin	\$45M	15.7%	Medium
Yield Yak	\$32M	18.3%	High

Key Metrics

- Track positions across multiple protocols
- Monitor yield farming opportunities
- Analyze impermanent loss risks
- Real-time APY calculations

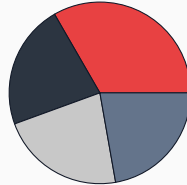

Comprehensive Wallet Analysis

Risk Assessment

- Portfolio diversification score
- Security vulnerability detection
- Transaction pattern analysis

Performance Metrics

- P&L tracking
- Historical performance
- Comparative analysis

Portfolio Distribution

Smart Contract Security Analyzer

Security Features

! Vulnerability Detection

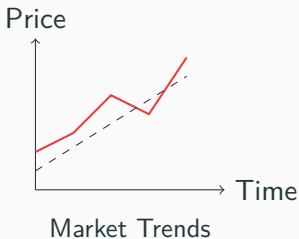

- Reentrancy attacks
- Integer overflow/underflow
- Access control issues

✓ Gas Optimization

- Inefficient loops detection
- Storage optimization tips
- Function visibility analysis

Automated Code Review → Risk Score → Recommendations

Market Intelligence & Trading Signals

AI-Powered Features:

- **Sentiment Analysis**
 - Social media monitoring
 - News sentiment scoring
- **Price Predictions**
 - Technical indicators
 - Machine learning models
- **Trading Opportunities**
 - Arbitrage detection
 - Yield optimization

NFT Analytics & Portfolio Tracking

Collection Analysis

- Floor price tracking
- Volume statistics
- Rarity calculations
- Holder distribution

Portfolio Features

- Total NFT value estimation
- P&L tracking
- Rarity score analysis
- Market trend alerts

NFT Collection Grid

Subnet Explorer & Validator Monitoring

Subnet	Validators	Uptime	Stake
DeFi Kingdoms	12	99.8%	2M AVAX
Swimmer Network	8	99.7%	1.5M AVAX
Crabada	10	99.5%	1.2M AVAX

Network Stats

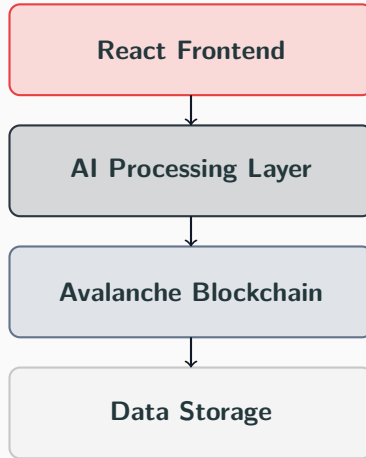

- Block production rate
- Transaction throughput
- Gas price monitoring

Validator Analytics

- Performance metrics
- Reward calculations
- Delegation tracking

Technical Architecture

Benefits & Return on Investment

For Traders

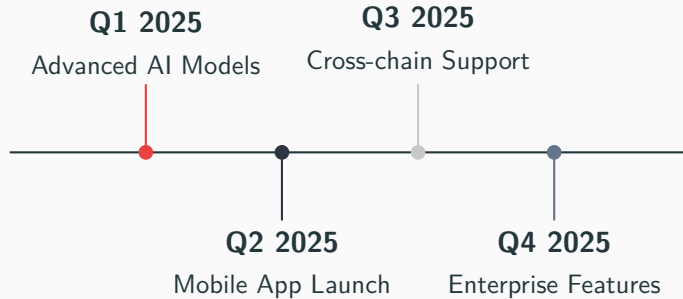

- ↑ 35% better trading decisions
- 🕒 80% time saved on analysis
- 60% risk reduction

For Institutions

- 📊 Professional analytics
- 👥 Team collaboration
- Compliance reporting

Average ROI: 250% in the first year

Development Roadmap

Pricing Plans

Feature	Starter	Professional	Enterprise
AI Chat Queries	100/month	Unlimited	Unlimited
Wallet Tracking	3	10	Unlimited
Real-time Data	✗	✓	✓
API Access	✗	Limited	Full
Support	Email	Priority	Dedicated
Price	Free	\$49/month	Custom

Thank You!
